Welcome to Employees Management system Instructions!!

*Note: instructions are meant for the customer/user.

Summary:

The following Employees Management system accommodates two temporary Data Bases.
Employee's Data Base
Shifts Data Base: consist of two parts "Past Shifts" and "Upcoming Shifts"

To use the mock system, we created a mock Data Bases of 5 employees
and 3 shifts. Shifts are moved to Past Shift Data Base automatically.

How to use:
you will be greeted by login panel: then you will be able to enter your employee's interface

```
Welcome to the Employees Management System!

You are on Login panel!

Please choose an action (1 or 2):
1. Enter to your Employee Role
2. Exit System
```

Next input the employee user ID to get to the system
Example Mock Users:
EMP001 -> cashier
EMP002 -> {manager , cashier } can be manager and can be cashier depend on the shift
EMP003 -> {HR Lead}
EMP004 -> {cleaner}
EMP005 -> {security , cleaner}

```
Please Enter Your ID:
EMP003

Welcome to the General Employee Panel!

Please choose an action (1,2,3 or 4):
1. Set Upcoming Shifts Availability
2. Enter to your Managing Role
3. Show Your Personal Information
4. Going back to Login panel
2
Moving to HR Lead Panel...
```

every employee has the following 4 options as default, then if you have Managing Roles, you will be able to get inside "Option number 2"
Each managing Role specified in the Systems requirements has it's own permissions,

example for HR Lead:

```
Welcome to the HR Panel!

Please choose an action (1,2,3,4,5 or 6):
1. Terminate Employee from System
2. Add New Employee to System
3. Set Shift Hours
4. Update Required Roles to Shift
5. Set All Required Shift Roles
6. Going back to General Employee panel
```

1. Option to fire employee, the system asks the HR lead for employee info to delete him for the system
2. Option to accept new employee, the system asks the HR lead for employee info to add him to the system
3. Setting a new default shift hours for all shifts on ward
4. HR Lead can edit the required number of employees for a chosen Role
5. Each Role has the designated number of employees to be set on the Shift, HR lead can specify the number for each role based on his expertise.

(Difference between option 4 and 5, option 4 can update only one role – number per request while option 5 can update in bulk.)

For Shift Manager:

```
Please choose an action (1,2,3,4 or 5):
1. create New Shift
2. Remove Employee from Shift
3. Add Employee to Shift
4. Promote Employee
5. Use cancel card
6. Go back to General Employee panel
```

1. Manger creates new Upcoming shift based on the tools that the system will provide
2. Removes employee from an upcoming shift
3. Adds employee to an upcoming shift, the system checks who are available to be assigned
4. Promote employee, can add another role to the set of Roles of the chosen employee
5. Manger can use his card to cancel items from the shopping cart

For Your Information:

- The system handles HR Lead options permanently, meaning every change he does will be affective from this point forward until he will decide otherwise.
  For example setting shift hours will be the ones that he decides for all shifts made from this point onward.
- The system holds Past Shifts up to 7 years, then deletes them.
- The system accommodates fully the User throughout his use of the system, no user will be left out. the system gives explanations about each step and has fail safes.

Good Luck!
